Scenery/Technical Direction (Vicki and Ron):

101. The spot for the broom clip has been marked on the back side of the DR support leg for platform A. We will not need one under platform D for the mop after all.

Props (Vicki)

102. Could the white on the handle of the small plunger be painted woodgrain so that it matches the larger plungers?

103. Mary chose the new money suitcase as the one to be used in the show. McQueen will also carry it as his briefcase in the first scene.

Costumes (Joe):

104. When she went to put it on tonight, Alli discovered that her right shoe was about to fall apart.

105. Fipp's new shoes are much better. If there is a way to give him either thicker socks or a very thin insole, they would be perfect.

106. The glass doorknob fell off the top of Cladwell's cane. We brought the pieces back down to the costume shop tonight

107. The bear will need a piece of Velcro to hold the pocket closed

108. Is there any ETA on Kevin's cop hat?

109. The chain on Mrs. Millennium's purse broke again tonight.

Lights (Mandy):

No notes tonight, thank you

Sound (Ron):

I I 0. Ed did not know where to find mic tape for tonight. Laurie pulled the emergency roll from she purchased for the ASM kit, but it was only a partial roll and won't last very long.

I I I. We scooted the DR monitor offstage to match the DL one, to help with a traffic problem.

Miscellaneous:

No other notes tonight, thank you.

Thanks everyone,
Laurie Kincman SM
