Exam 3 is on Wednesday November 12. The material covered is from September 2 to the end of class on Monday, November 3 (if we are on schedule, then this is through Section 11.7) with emphasis on material after October 16. At least one question on the exam will come from List A and at least one question will come from the list below.

**List B for Exam 3**

1. What is the definition of an absolutely convergent series?
2. State the Absolute Convergence Test.
3. Give an example of a series which is conditionally convergent.
4. Give an example of a series which is absolutely convergent.
5. Give an example of a series which is divergent.
